

NIAGARA SMA PARTS

Software Maintenance Agreement

DESCRIPTION

A Niagara Software Maintenance Agreement (SMA) provides access to the latest Niagara technology for cybersecurity, graphics visualization, provisioning, tagging, analytics, certifications, compliance and more.

An SMA is required at the time of purchase and can be purchased anytime before the current expiration date to prevent loss of maintenance coverage. An initial SMA is valid for 18 months. Supplemental SMAs are available for extending coverage from the time of expiration for the initial SMA for 1-, 3-, and 5-year terms.

FEATURES

Access to the latest technology

- Tagging improvements in support of Project Haystack, Brick Schema and other ontologies
- Visualization improvements as the HTML5 standard evolves

Asset management

- PKI certificate management as cyber standards evolve
- Most up-to-date templating features for easy software provisioning
- Check and manage SMA compliance with the included cloud-hosted Niagara Asset Manager central console.

Backup-as-a-service*

- Access device backups via the Niagara Cloud.

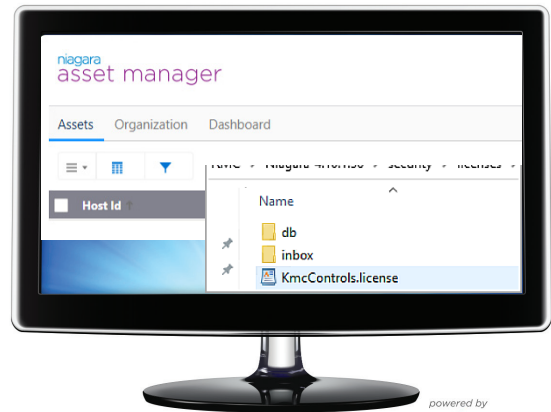

Access to Niagara analytics upgrades

- Predictive maintenance capabilities
- Improved energy monitoring and management analytics

ORDERING INFORMATION

Software Management Agreement Options

DESCRIPTION	MODEL
Niagara: JACE 8005 - 18 month maintenance	SMA-8005-1YR-INIT
Niagara: 8005 - 1 year maintenance	SMA-8005-1 YR
Niagara: 8005 - 3 year maintenance	SMA-8005-3YR
Niagara: 8005 - 5 year maintenance	SMA-8005-5YR

powered by
niagara
framework™

Future-proofing

- Ability to harmonize information inside assets as new data sources emerge

New drivers

- Access to emerging or adjacent drivers and standards such as MQTT and OPC UA

Driver Updates

- Revision updates to open and proprietary protocols including BACnet and SNMP

Certification updates

- BACnet certification
- FIPS 140-2 accreditation
- RMF accreditation

Cyber Security Updates

- Up-to-date defense against cyberthreats
- Enhancements to standards such as TLS
- Supports new encryption keys and progression of encryption standards
