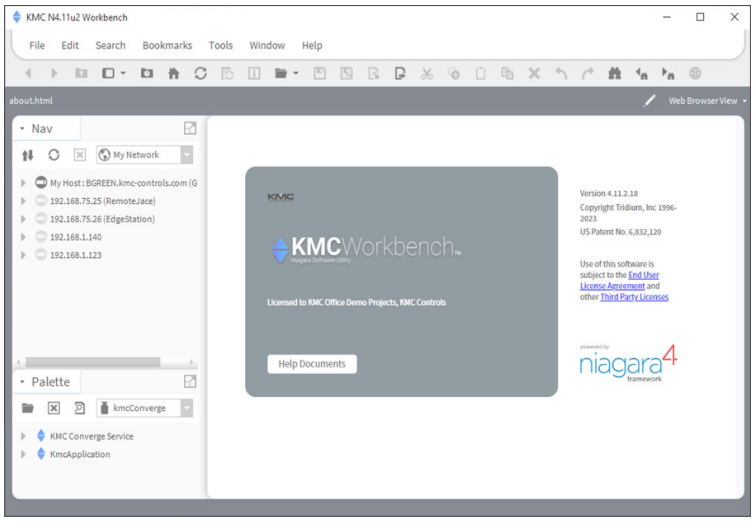
KMC Workbench™
Niagara Software Utility

DESCRIPTION

KMC Workbench is a Niagara 4-based software solution to serve small- to large-scale building automation systems.

KMC Workbench provides the observer-level functions for a network of JACE, Niagara Edge® and other field devices. The module serves real-time graphical information to standard web-browser clients and performs essential functions such as analytics, centralized data logging/trending, archiving to external databases, alarming, dashboarding, system navigation, master scheduling, database management and integration with other enterprise software applications.



LICENSING

Download KMC Workbench N4 Supervisor from the web site and run the setup. This will provide the host ID to furnish to KMC Customer Service for activating the relevant N4 licenses.

Additional licensing is required for use with Niagara supervisors and JACE devices. KMC Workbench DEMO inlcudes these licenses; KMN-S-# and KMN-J parts require additional licensing.

REQUIREMENTS

KMC Workbench is supported in MS Windows only.

ORDERING INFORMATION

Driver Options

MODEL	DESCRIPTION
