## Description

The HCO-1034/1035/1036 control enclosures provide a convenient method of surface mounting and protecting pneumatic, electrical, and digital devices. The cabinet is easily mounted on the wall, while the subpanel with the control devices may be added later.

Cabinet doors can be configured to open to the right or left. If more than one enclosure is necessary, they are easily mounted next to each other and/or joined by removing the required knockouts, located on all four sides. Fastened with appropriate fittings and lock nuts, these enclosures provide a neat, flexible installation.
